DETAILED ACTION

Claim Objections

Claims 32 and 33 are objected to because of the following informalities: Both claims are dependent upon claim 13 and are identical. The examiner is pretty sure that claim 32 should be dependent upon claim 6 and will be examined as such. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Amended claims 1, 6, 13 and 22 recite that the order comprises information associated with a type of vehicle from which the order is transmitted. It is unclear what this limitation means because applicant's disclosure does not disclose different types of vehicles. For the purposes of examination, the examiner will consider this "association" to be the same as an identifying code.

Claims 31-34 recite, "the second signal sent by the receiver". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipate by Paul.

Paul shows a golf information and course management system. The cart (vehicle) mounted units (PDA, CPU) with broadcast capability (transmitter) will allow additional features. Refreshments (club house is the business) could be ordered in advance so they are available at the turnaround, further speeding play (column 8, lines 40-50). Identifying codes, translating signals, and accounts are all inherent features of the system. Computer system 8 (receiver) can transmit signals via antenna 10. (This receiver is capable of transmitting a reply to the transmitter reporting a status of the order. The fact that the Paul reference does not disclose transmitting a reply for this reason is immaterial.)

Response to Arguments

Applicant only argues the new limitations added to the claims, which are addressed by the rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
